

SANYO 20EZ DELUXE KIT (1 Plus Cap Kit/1 Audio Bd Kit)

1uf50v	C166/C302/C453/C454
1uf160v	C408/C467/C610
4.7uf25v	C162/C411 Non-polarized
10uf50v	C201/C301/C303/C406
10uf160v	C407/C471
22uf50v	C464
47uf10v	C458
100uf16v	C459
100uf160v	C410/C472
220uf16v	C161/C202
220uf25v	C469
330uf25v	C468
470uf10v	C609

Audio Board

4.7µf 25v NP	C371
4.7µf 160v	C372/C374
10µf 50v	C375
10µf 160v	C378
22µf 160v	C377
100µf 25v	C373
2SA940	TR374
2SC2073	TR373

The actual voltage rating value may be higher than stated & only serves for a higher safety margin, & is a perfectly acceptable replacement. Do not use a lower than stated voltage rating.

Capacitors usually have one lead longer than the other and this longer lead is generally the positive or + lead and most boards are marked with the + or - negative signs. They almost always have a striped side which is most often the negative (-), but can sometimes be marked in the stripe as +, so it is best to look closely at each one before inserting it. Pre-cut capacitors will be marked with the + or - sign in the striped area.

A best course of action would be to replace them one at a time, carefully observing how the markings are on the original cap, as sometimes a pc board will be incorrectly silk-screened.
